REFFERENCE LETTER

D-Marin is dedicated to providing a premium service in marina management and development, offering distinguished experiences to clients and outstanding standard of quality to business partners.

As a representative of D-Marin, I am pleased to provide references to summ-it s.a. as a long-term IT solutions provider.

Since 2018, summ-it has been supporting D-Marin's growth through various data solutions that help analyse customer behaviour and adapt D-Marin's business to their needs. **Managed Cloud Service, Google BizInsights, Marketing Data Warehouse** and **Power BI reporting** are just a few examples of our collaboration.

The Google BizInsights implementation helps us to better understand customer needs. By AI solution – Cognitive Services, we are able analyse clients' opinions and classify them, and quickly react on their feedback.

Furthermore, summ-it secures D-Marin's data by implementing and maintaining Azure managed cloud platform. This service ensures that the data collected by D-Marin is secure and accessible all the time.

Michał Masłowski
